RE: Immediate Response Action - 120-Day Status Report  
Former Raytheon Facility  
430 Boston Post Road  
Wayland, Massachusetts  
Permit No. 133939

Dear Sir or Madam:

On behalf of Raytheon Company (Raytheon), Environmental Resources Management (ERM) is submitting an Immediate Response Action - 120-Day Status Report for the site located at 430 Boston Post Road, Wayland, Massachusetts. This submittal was prepared in accordance with the requirements of the Massachusetts Contingency Plan (MCP), 310 CMR 40.0000.

## **BACKGROUND**

In accordance with the requirements of the Massachusetts Contingency Plan (MCP), 310 CMR 40.0480, Environmental Resources Management (ERM) submitted a Phase I-Initial Site Investigation (Phase I) report for the site to the Massachusetts Department of Environmental Protection (DEP or Department) in July 1996 and a Tier Classification filing in January 1997. The Department issued Raytheon a Tier IB Permit, effective 21 May 1997. A Phase II-Comprehensive Site Assessment (Phase II) of the site is currently in progress.

Recent results of an on going Phase II - Comprehensive Site Assessment have linked a suspected area of stunted growth to elevated levels of metals, polychlorinated biphenyls (PCBs) and polynuclear aromatic hydrocarbons (PAHs). The reduced stem count of biota in this area indicates that a potential imminent hazard may exist, based on the criteria set forth in 310 CMR 40.0955(3). The potential Imminent Hazard

ERM01185

Condition was reported to the Northeast Regional Office on 26 April 2000.

An IRA Plan was submitted to the Department on 26 June 2000 following the imminent hazard determination. The Imminent Hazard Evaluation determined that the site did not pose an Imminent Hazard to human health or safety, but posed a potential Imminent Hazard to the environment. The objective of the IRA plan is to continue to assess site conditions according to the Phase II Scope of Work and addendum in the wetlands and to delineate the extent of impact to sediments and surface water, and assess risk to human health and the environment.

Pursuant to 310 CMR 40.0530, a Major Permit Modification Application was filed on 25 May 2000 to upgrade the site tier classification and permit from IB to IA following the re-evaluation of the site Numerical Ranking Score (NRS). On 7 September 2000, Raytheon received a Notice of Proposed Permit Decision from the DEP. The department determined, based its review of the Major Permit Modification Application that a new Tier IB permit would be issued with special conditions.

### ***STATUS OF ASSESSMENT***

ERM has continued to conduct assessment activities as outlined in Phase II Scope of Work and addendum. No field activities or sampling have been conducted during this time period. Assessment activities have been limited to the evaluation of potential risk at the site including conducting an ecological risk characterization and human health risk characterization. Non-assessment activities include the initiation of the Public Involvement Process and public meetings.

### ***SIGNIFICANT NEW SITE INFORMATION***

No new site information or data has been gathered since the submittal of the IRA Plan.

### ***MANAGEMENT OF REMEDIAL WASTE***

No remediation waste has been generated on-site.

### ***REMEDIAL SYSTEMS DATA***

No remedial systems are operated on-site.

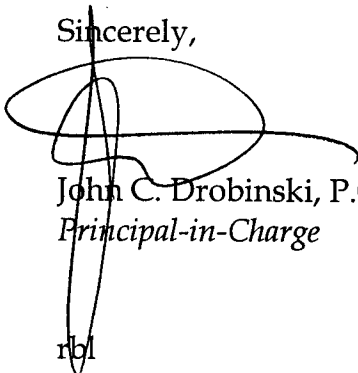

### ***OTHER INFORMATION***

No other information is required at this time.

### ***LSP OPINION***

It is the opinion of the LSP that this IRA is being conducted in conformance with the IRA Plan.

Sincerely,
