Re: DEP File No. 322-0564, 430 Boston Post Road, Former Raytheon
Facility

Dear Mr. Kadlik:

Environmental Resources Management (ERM), on behalf of Raytheon Company (Raytheon), has proposed to conduct vertical groundwater profiling at three locations along an unnamed roadway off Old Sudbury Road and adjacent to the Sudbury River, within the Town of Wayland (Figure 1). This letter is a follow-up to a telephone conversation on 19 November 2003, between yourself and Jeffrey Frazier of ERM, and provides written notification of the proposed work.

The proposed activities were presented to the Massachusetts Department of Environmental Protection (DEP) in the "Final Scope of Work", dated 17 June 2003 and to the Town of Wayland Conservation Commission (Con Com) in a Notice of Intent (NOI) submitted 26 September 2003. These activities are being conducted as part of an environmental site investigation pursuant to the Massachusetts Contingency Plan (MCP) 310 CMR 40.0000 at the Former Raytheon Facility located at 430 Boston Post Road in Wayland, Massachusetts. The NOI was approved with conditions by the Con Com on 20 November 2003. The DEP issued file number 322-0564 for the activities. A copy of the NOI is attached for your review.

The unnamed road along which the proposed work will be performed runs northwest from Old Sudbury Road in Wayland to a blocked, abandoned bridge over the Sudbury River. The abandoned road runs adjacent to the Wayland Country Club. The vertical groundwater profiling will be conducted using a Modified Waterloo Profiler along the margin of this road using a combination of truck-mounted drill rigs and drilling techniques.

As discussed, ERM will complete the following prior to commencement of activities:

- Underground utilities along the roadway will be marked using Dig Safe System, Inc.;
- Town of Wayland Water Department will be notified of the activities and requested the identify supply lines;
- Vacuum extraction of soil at profile locations along the unnamed roadway to a depth of approximately eight feet to verify the absence of underground utilities; and
- Mr. William Kilcoyne of the Town of Wayland Parks and Recreation has also been notified of the proposed work. ERM has requested a meeting with Mr. Kilcoyne to further discuss the work locations, which are in proximity to a Town of Wayland monument.

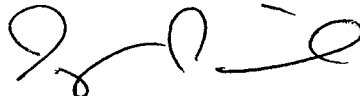

As a result of our phone discussion, it is ERM's understanding that permission has been granted for the proposed activities on 19 November 2003 by the Town of Wayland Highway Department. Activities are expected to commence in early February 2004 and last approximately ten working days along this roadway. At the completion of the project, the remaining borehole will be filled in and sealed with grout to ground surface. No permanent equipment will remain at the proposed locations.

Please contact ERM if any additional parties should be notified. If you have any questions or comments, please contact the undersigned at (617) 646-7800.

Sincerely,

John C. Drobinski, P.G., LSP
Principal-in-Charge

Jeremy J. Picard, P.G.
Project Geologist
