Re: Notice of Injection of Remedial Additive and
Upcoming PIP Meeting on 28 November 2007
Former Raytheon Facility
430 Boston Post Road
Wayland, Massachusetts

Dear Mr. Benson R. Gould:

On behalf of Raytheon Company (Raytheon), Environmental Resources Management (ERM) has prepared this letter to inform members of the Public Involvement Plan (PIP) group of commencement of a remedial additive program at the Former Raytheon Facility at 430 Boston Post Road in Wayland, Massachusetts (Site) as part of ongoing Remedy Operation Status (ROS) activities. This letter is also intended to inform the PIP group of the upcoming PIP meeting to be held 28 November 2007.

The remedial additive program will address chlorinated solvent (CVOC) concentrations in groundwater in the MW-33 Area of the Site and follows the monitoring period tracking performance of the injection completed in 2004 (described in the Phase IV Completion Report; ERM, 24 November 2004). Beginning 12 November 2007, potassium permanganate will be distributed to the subsurface to initiate in situ chemical oxidation of remaining concentrations of CVOCs. Permanganate distribution is scheduled to be complete by 27 November.

A summary of the remedial additive program will be presented during the next PIP meeting to be held 28 November 2007. The meeting will be held at 7:30 PM in the Large Hearing Room in the Wayland Town Building. An agenda for the meeting is enclosed.

Raytheon will continue to make copies of pertinent reports and correspondence available to the public at the Wayland Public Library Repository, Wayland Board of Health Office Repository and on the Extranet Webpage (www.ermne.com; username: raytheon; password: wayland).

If you have any questions or comments, please contact Louis Burkhardt of Raytheon at (978) 436-8238.

Sincerely,

John C. Drobinski, P.G., LSP
Principal-in-charge

Jason D. Flattery
