Re: Transmittal of Groundwater Analytical Data  
Former Raytheon Facility  
430 Boston Post Road, Wayland, Massachusetts

Dear Ms. Herland:

On behalf of Raytheon Company (Raytheon), Environmental Resources Management (ERM) is submitting the results of groundwater sample analyses from the Former Raytheon Facility located at 430 Boston Post Road in Wayland, Massachusetts (Site). These results are submitted pursuant to 310 CMR 40.1403(10) of the Massachusetts Contingency Plan (MCP), and as you requested during a telephone conversation on 16 September 2008.

ERM has collected a total of 67 samples from 11 wells on portions of the Site within the boundaries of your property from September 2005 through June 2008. Sample analyses were conducted by Alpha Woods Hole Laboratories of Westborough, Massachusetts.

Acetone, 1,1-dichloroethane, 1,4-dioxane, cis-1,2-dichloroethene, and dissolved arsenic have been detected at various time in various locations in the wells on your property. However, all detections have been below applicable MCP Method 1 GW-1 standards.

Chloroform was detected above MCP Method 1 GW-1 standards in one well (MW-556S) in September 2005 and October 2005. It was not detected in the three subsequent sampling rounds in April, July, and September 2006.

In support of bioremediation monitoring activities on Site, the following additional analyses, for which there are no regulatory standards, have been conducted: methane, ethane, and ethene as dissolved gases; alkalinity; nitrogen as nitrate; total Kjeldahl nitrogen; total phosphorus; sulfate; dissolved iron; dissolved manganese; and total organic carbon.

If you have any questions or comments, please contact the undersigned at (617) 646-7800 or Louis Burkhardt, Raytheon Company, at (978) 436-8238.

Sincerely,

John C. Drobinski, P.G., LSP
