

ANNUAL INSPECTION REPORT CONTENT

*Items for Narrative Discussion:*

- Describe the monitoring inspections that occurred since the last report.
- Concisely describe remedial actions completed during the monitoring year to meet the four success standards - actions such as removing debris, replanting, controlling invasive plant species (with biological, herbicidal, or mechanical methods), re-grading the site, applying additional topsoil or soil amendments, adjusting site hydrology, etc. Also, describe any other remedial actions done at each site.
- Give visual estimates of (1) percent vegetative cover for each mitigation site and (2) percent cover of the invasive species listed under Success Standard No. 2, above, in each mitigation site.
- What wildlife species use the site(s) and what do they use it for (nesting, feeding, shelter, etc.)?
- By species planted, describe the general health and vigor of the surviving plants, the prognosis for their future survival and a diagnosis of the cause(s) of morbidity or mortality.
- What remedial measures are recommended to achieve or maintain achievement of the four success standards and otherwise improve the extent to which the mitigation site(s) replace the functions and values lost because of project impacts?

*Monitoring Report Appendices:*

Appendix A - A copy of all permit special conditions.

Appendix B - An as-built planting plan showing the location and extent of the designed planting and seeding areas. Within each restoration area, the plan shall show the location and extent of the planting cells and each species planted within the cells.

Appendix C - A vegetative species list of the volunteer species in each plant community type.

Appendix D - Representative photos of each mitigation site taken from the same locations for each monitoring event.
