RE: NPDES Exclusion #MA 03I-123
Former Raytheon Facility
Wayland, Massachusetts
January to February 2004

Dear Sir or Madam:

On behalf of Raytheon Company (Raytheon), Environmental Resources Management, Inc. (ERM) is submitting analytical reports for water samples collected from the surface water treatment system at the former Raytheon site located at 430 Boston Post Road in Wayland, Massachusetts. This report has been prepared in support of the National Pollution Discharge Elimination System (NPDES) Exclusion Permit for the discharge of treated surface water from dewatering activities on site. This is the final submittal as site remedial activities have been completed.

Wetland remediation and restoration activities at the site required dewatering of the excavation area. Two sumps in the excavation area transferred collected surface water and soil pore water to the water treatment system. The water treatment system consisted of equalization tanks, primary bag filters, treatment by activated carbon, and secondary bag filters. The treated water was discharged into the Sudbury River downstream of wetland restoration activities.

In mid-December 2003, all work related to the wetland excavation on the site was suspended for approximately one month due to rising water levels of the Sudbury River and the wetland area. The dewatering system was shut down until 17 January 2004 when the river level subsided and the excavation recommenced. In accordance with the NPDES Permit Exclusion, beginning in January 2004, water samples were collected monthly. All samples were submitted for analysis of polynuclear aromatic hydrocarbons

(PAHs), polychlorinated biphenyls (PCBs), arsenic, copper, chromium, lead, silver, pH and total suspended solids (TSS) using the appropriate EPA analytical methods. Analytical results are summarized in Table 1. Copies of laboratory analytical reports are included in Appendix A.

The system has operated within the limits of the exclusion permit during January and February 2004 with the exception of TSS. On 28 January 2004 there was an exceedance of 140 mg/L for TSS. It was believed that the treatment system had been sampled between sediment bag filter changes causing sediment collected in the bottom of the filter housing to enter the effluent sample. The system was resampled on 9 February 2004 and TSS was again in exceedance (110 mg/L). The system was sample again the following week (16 February 2004) and the exceedance of TSS was 180 mg/L. The system was shut down on 24 February 2004. The final exceedance led to the discovery of a 2-foot build up of sediment in the settling tank. The outtake pipe was inundated with sediment causing the exceedance. No further discharge occurred, however and the portion of the project that required the treatment system was completed on 27 February 2004. It should be noted that the river discharge pipe was fitted with a bag filter that most likely abated any discharge impacts. The treatment system has been decommissioned and removed from the site.

If you require any additional information, please contact the undersigned at (617) 267-8377.

Sincerely,

Rachel B. Leary
Project Manager

GLOSSARY OF TERMS AND SYMBOLS

REF Reference number in which test method may be found.
METHOD Method number by which analysis was performed.
ID Initials of the analyst.
ND Not detected in comparison to the reported detection limit.

Please note that all solid samples are reported on dry weight basis unless noted otherwise.

LIMITATION OF LIABILITIES

Alpha Analytical, Inc. performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical, Inc., shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical, Inc. be held liable for any incidental consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical, Inc.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding times and splitting of samples in the field.

GLOSSARY OF TERMS AND SYMBOLS

REF Reference number in which test method may be found.
METHOD Method number by which analysis was performed.
ID Initials of the analyst.
ND Not detected in comparison to the reported detection limit.

Please note that all solid samples are reported on dry weight basis unless noted otherwise.

LIMITATION OF LIABILITIES

Alpha Analytical, Inc. performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical, Inc., shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical, Inc. be held liable for any incidental consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical, Inc.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding times and splitting of samples in the field.

GLOSSARY OF TERMS AND SYMBOLS

REF Reference number in which test method may be found.
METHOD Method number by which analysis was performed.
ID Initials of the analyst.
ND Not detected in comparison to the reported detection limit.

Please note that all solid samples are reported on dry weight basis unless noted otherwise.

LIMITATION OF LIABILITIES

Alpha Analytical, Inc. performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical, Inc., shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical, Inc. be held liable for any incidental consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical, Inc.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding times and splitting of samples in the field.
