

APPENDIX C COMMUNITY CONCERNS ABOUT THE SITE

From 22 August 2000 Meeting with Raytheon and ERM

Attendees:

<i>Name</i>	<i>Affiliation</i>
Ron Slager	Raytheon
Rachel Leary	ERM
John Drobinski	ERM
Joe Laydon	Planning Board
Katie Holden	Conservation
Jeff Ritter	Executive Secretary
Linda Segal	Selectman
Steven Calichman	Health Director

The primary reason for the Selectmen requesting this PIP Process was to understand environmental issues at the Site, because the Town of Wayland may have interest in acquiring certain portions of it. The following are concerns about the Site and the Public Involvement Plan (PIP) Process, identified by the town officials in attendance:

- The impact the remedial investigation and restoration would have on the occupants of the current office building on-site and future Site occupants. Town officials suggested making information available to the building occupants either through the property owner or by other means.
- The Primary Information Repository location will be determined by the Executive Secretary. The Secondary Information Repository location will be the Board of Health Office.
- The following people and/or organizations will be added to the Mailing List:

Planning Department
Conservation Commission
Wastewater Management – Gene Roberts
Surface Water Quality
National Parks Service – Jamie Fosberg

Congress Group
Bright Horizons via Congress Group

- It was also agreed Public meetings will be scheduled per the requirements identified in Section 4.5.1.

From 20 January 2004 Meeting with Raytheon and ERM

Attendees:

<i>Name</i>	<i>Affiliation</i>
Edwin Madera	Raytheon
John Drobinski	ERM
Linda Segal	PIP Participant

This meeting was held at the request of Linda Segal to discuss how to best incorporate the northern area RTN into the existing PIP, update the PIP to reflect Site history through January 2004 and document on-going Site activities. The original PIP was issued in November 2000.

The following items were identified by Linda Segal regarding the PIP:

- The public comment period should be updated to 30 days, increased from 20 days.
- Section 2.0 of PIP should be revised to include new RTN and site activities after September 2000. These updates should also include a list of all PIP meetings and their topics. Site figures should also be updated to reflect recent activities.
- Language should be added to document Raytheon's funding of a technical expert for the Board of Selectmen and the technical meeting held to discuss/explain Site activities and findings.
- Language should also be included to explain Activity and Use Limitations (AULs) and deed restrictions.
- Contact information should be updated to include the Raytheon Extranet. The Mailing List should also be updated.
